Active Consciousness: Awakening the Power Within is the second book by best-selling author Amy Lansky, PhD (Impossible Cure: The Promise of Homeopathy – www.impossiblecure.com). Unique in its breadth and accessibility, Active Consciousness will appeal to educated readers who wish to learn more about spirituality, consciousness, and meditation and who would like to develop the power of active consciousness—the ability to tap into the inner Self and guide the trajectory of the world in which they live. The book includes: a discussion of scientific studies of psychic phenomena; a model of how these phenomena might be operating (based on an easy-to-understand model based on higher dimensions in space); a review of esoteric systems of thought, including the teachings of Gurdjieff, Steiner, and Kabbalah; an explanation how alternative energy-based therapies (like homeopathy) might work; and an introduction to personal self-exploration and development, including meditative exercises and active consciousness experiments.
